

Ugbor Chidinma Benita

Personal Portfolio Website | 5th-Year Medical Student (MBBS Candidate)

Abia State University (ABSU) · ABSUTH, Aba, Nigeria · MBBS 2019–2027

Document generated: 23 May 2026

Project Overview

A world-class personal portfolio website was designed for Ugbor Chidinma Benita, a fifth-year medical student at Abia State University training at the Abia State University Teaching Hospital (ABSUTH). Three distinct design variants were built, version-controlled with Git, and published to GitHub. Because no photographs were available yet, every image area uses a clearly-marked placeholder.

Information Provided

Full Name	Ugbor Chidinma Benita
University	Abia State University (ABSU)
Teaching Hospital	ABSUTH — Abia State University Teaching Hospital, Aba
Programme	MBBS (Bachelor of Medicine, Bachelor of Surgery)
Started / Year	2019 · currently 5th year
Expected Graduation	2027 (allowing for academic-calendar disruptions)

The Three Designs

Variant	Theme / Look	Highlights
Sky-Blue	Light sky-blue & white, airy, serif headings (matches the reference template).	Hero, 'Special Services' cards, profile strip, portfolio gallery, tabbed Resume, appointment + contact.
Classic	Navy / teal / gold, sophisticated and elegant.	Hero with stats & floating cards, About, Education timeline, Clinical Rotations, Skills, Achievements, Contact.
Merged	Best of both — dark navy/teal hero + clean light sections + gold accents.	Combines the dramatic hero, rotation cards & animations of Classic with the tabbed Resume, services & gallery of Sky-Blue.

Git Repository & Branches

Repository: github.com/DavidUgbor/CHI (a dedicated repo, isolated from the home-folder Git tree).

Branch	Contents	Design
main	README.md	Project overview

sky-blue	index.html	Light sky-blue (reference style)
classic	index.html	Navy / teal / gold (original)
merged	index.html	Best of both ✓

Each design branch ships its variant as **index.html**. All branches were pushed to GitHub and track *origin*. Commits use a local 'Chidinma' author identity; no global Git config was changed.

Local File Locations

- **C:\Users\USER\chidinma** — main Git repo (branches: main, sky-blue, classic, merged)
- **C:\Users\USER\portfolio\index.html** — original sky-blue source file
- **C:\Users\USER\portfolio\portfolio-classic.html** — original classic source file

Placeholders To Fill In

These items are clearly marked in every design and should be replaced with real details:

- Photographs — hero portrait, About portrait, and portfolio gallery thumbnails
- Specialty of interest (e.g. Internal Medicine / Paediatrics / Obs & Gynae)
- Secondary school name
- Academic award name(s) and year(s)
- Leadership role(s) (e.g. Class Rep, Society Officer, Peer Tutor)
- Real research / case-study titles
- Contact details — phone number, email address, LinkedIn & social links

Suggested Next Steps

- Choose a primary design and set it as the repository's default branch on GitHub.
- Publish it free via **GitHub Pages** for a live URL (e.g. davidugbor.github.io/CHI).
- Add real photographs and replace all bracketed placeholders.
- Optionally wire the contact form to a real email service (e.g. Formspree).
